SIZE	A4	VERIFIED	GC	DATE:— 09.10.2024		SHEET:— 01/08		

Notes:

- 1) All cable length were estimated using available scan data & vessel drawings and the length shall be verified/checked at site before installing by yard.
- 2) Consumables like Cable glands, lugs, cable ties, flat bars, nut & bolts required for the electric works not included in the list and these are to be procured based on actual installation at site by yard/owner.
- 3) All new cables need to be laid shortest route as much as possible based on the sitecondition or on existing cable trays by shipyard
- 4) Cable used should be shipboard cables designed according to IEC 60092.Flame retardent according to IEC 60332-1-2 / 60332-3-22
- 5) In general,cables shall be of cross linked polyethylene (XLPE) insulated,steel wire braided or copper wire braided,with thermoplastic polyolefin out sheath.
- 6) All cables are to be supplied onboard in full drum,without cutting
- 7) *' Cables and cable glands used in Hazardous area shall be in compliance with class requirements.
- 8) Cables of 4-20mA and RS485 signals need shield to earth just at one side.
- 9) All cables are to be supplied in full drum without cutting.
- 10) Refer Valve Configuration sheet & Connection sheet attached (Page-04/08)
- 11) Screened cables are to be used for signal cables
- 12) Owner to check and confirm whether vessel's existing remote control valve system is capable of accomodating new control valves due to BWTS addition.
- 13) Deleted items are marked in 'red' and updated ones in 'green'
